SELECTED PROJECTS

American Drm

TypeScript · React · Tailwind CSS · Supabase · Vercel

FREELANCE FULL-STACK DEVELOPMENT

A full-stack e-commerce experience for a fashion brand, with responsive product discovery, cart, authentication, inventory, and order storage. **Product browsing → stored orders.**

SmartGallery

React · AWS Lambda · S3 · Cognito · API Gateway · DynamoDB · Rekognition

CLOUD & SERVERLESS DEVELOPMENT

A serverless image-management application developed through the FSU AWS Club with a reusable notification system for clear upload feedback. **Global toasts + upload progress.**

Airbnb Superhost Prediction

Python · Scikit-Learn · Pandas · NumPy · Jupyter · Git

MACHINE LEARNING

A Scikit-Learn classification pipeline that predicts Superhost status using operational and host-related metrics. **0.804 AUC.**

Coda

TypeScript · React · Node.js · Express · Supabase · Gemini · Spotify API

FULL-STACK PRODUCTIVITY PLATFORM

A student workspace combining assignment tracking, AI-powered summaries and questions, calendar imports, and music playback. **Six tools → one focused workspace.**
